Operations and Facilitiies Manager
Buffalo & Fort Erie Public Bridge Authority
Jul 2003 – Oct 2015 • 12 yrs 4 mos
Buffalo/Niagara, New York Area

Serving as the senior operating manager with responsibilities including the overall planning and management of capital projects, toll//traffic departments, information technology and maintenance functions for the corporation. Responsibilities are divided amongst active project management, managing day-to-day operations and maintaining effective working relationships with key stakeholders including Board of Directors, employees, government agencies,and the public.

Accomplishments while in this role include:
· workforce restructuring;
· corporate headquarters consolidation and relocation;
· labor contract negotiated settlements;
· improved public image through aesthetic facility improvements;
· building improvements projects in the U.S. and Canada;
· managing $8M operating budget with average annual growth of less than 2%;
· labor - management dispute resolution;
· maintaining effective working relationships;
· establishing a culture of high expectations;
· managing operations and capital projects;
· managing capital infrastructure improvement projects in excess of $40 million.

Recent initiatives include:
· leading the design on a $22M Construction Management at-Risk building project;
· managing a $10M bridge widening project;
· planning for future capacity expansion improvements involving environmental review, property acquisition and public involvement.

Information Technology and Marketing Manager
Buffalo and Fort Erie Public Bridge Authority
1999 – 2003 • 4 yrs
Buffalo/Niagara, New York Area

Senior management position with responsibility for two major corporate functions: Information Technology and Marketing Communications. Responsibilities in the technology area included strategic planning for and daily direction of information technology functions, supporting Administration, Finance, Human Resources, Engineering and Operations. Regular duties included the management of network engineering staff and contractors in the ongoing development, operations and maintenance of information technology services.

Responsibilities as manager of Corporate Communications included strategic planning for and daily direction of tasks associated with both internal and external communications. Marketing plan development for special projects as well as community awareness campaigns is included. Regular duties included the management of key personnel responsible for corporate communications.

Intelligent Transportation Systems Project Manager
Buffalo and Fort Erie Public Bridge Authority
1997 – 1999 • 2 yrs
Buffalo/Niagara, New York Area

Served as project manager for several Intelligent Transportation System projects utilizing DSRC technologies. Management tasks included facilitation for multiple government agencies and private industry from the United States and Canada, in an effort to build consensus on all aspects of the project. Considerable accomplishments were made in resolving significant institutional, legal, regulatory and technical issues.
